

(LOT-406) IBM Notes and Domino 9.0 Social Edition System Admin

1

John registered a new server. In which one of the following was the Server document placed?

- A. NAMES.NSF
- B. CERTLOG.NSF
- C. CATALOG.NSF
- D. DIRECTORY.NSF

2

Why did Dawn designate Server1/Boise/Acme as the Administration Server for the Domino Directory?

- A. To make sure that all new users were registered on Server1/Boise/Acme.
- B. To prevent users from making changes to the Domino Directory on Server1/Boise/Acme.
- C. To force administrators to make all changes to the Domino Directory on Server1/Boise/Acme.
- D. To ensure that the Administration Process would process all Domino Directory changes on Server1/Boise/Acme.

3

Installing which one of the following license types will NOT result in the installation of a Notes client?

- A. Notes Client
- B. Domino Designer
- C. Domino Administrator
- D. All will install the Notes client

4

John set up a Domino domain and organization. Which one of the following describes the difference between a Domino domain and a Domino organization?

- A. There is no difference. Domains and organizations function in the same manner.
- B. Domains refer to a company's hierarchical structure. Organizations refer to users who share a common organizational certifier.
- C. Domains are comprised of users and servers that share a common Domino Directory. Organizations define security and naming conventions.
- D. Domains define security and naming conventions. Organizations are comprised of users and servers that share a common Domino Directory.

5

Joseph wants to build a naming convention for his organization where user names would have the following format:

Beth Roy/Los Angeles/Acme
Dawn Maxey/Cincinnati/Acme

Which one of the following should Joe do to accomplish this?

- A. Create a Common Name (CN) Certifier named Acme and then create Organizational (O) Certifiers named Los Angeles and Cincinnati
- B. Create an Organizational (O) Certifier named Acme and then create Organizational Unit (OU) certifiers named Los Angeles and Cincinnati
- C. Create a Organizational (O) Certifier named Los Angeles, an Organizational (O) Certifier named Cincinnati and an Organizational Unit (OU) certifier named Acme
- D. Create two Organizational (O) Certifiers named Acme and use one to create an Organizational Unit (OU) Certifier named Los Angeles and the other O Certifier to create an OU Certifier named Cincinnati

6

Which one of the following group types is used to prevent access to Domino servers?

- A. Mail only
- B. Servers only
- C. Deny list only
- D. Access Control List only

7

Joe, in DomainA, sent mail to Jim using the following explicit address: Jim@DomainC@DomainB. Given that proper Connection documents exist, which one of the following explains the route this message took?

- A. From a server in DomainA to a server in DomainB
- B. From a server in DomainA to a server in DomainC
- C. From a server in DomainA to a server in DomainB to a server in DomainC
- D. From a server in DomainA to a server in DomainC to a server in DomainB

8

Joe, a Lotus Notes administrator, is planning to implement policy documents. Which one of the following best describes what policy documents are defined for?

- A. Users, O, OU, Groups
- B. Users and Groups only
- C. Users, O, OU, Servers
- D. Users, Groups, and Servers only

9

Joe, the head system administrator at Acme Corporation, needs to have the highest administration level available. Which one of the following levels should Joe have?

- A. All
- B. Full
- C. System
- D. Administrator

10

Joe is creating a policy document. Which one of the following best describes the user settings he can define within the policy document?

- A. Registration, Setup, Archiving, Desktop, Security
- B. Registration, Setup, Archiving, Desktop, Groups
- C. Registration, Setup, User ID, Welcome Page, Security
- D. Registration, Mail, Archiving, Welcome Page, Security

11

The Organizational certifier is named Acme. Each location has an Organizational Unit certifier from the Acme certifier that references the location or city. Susan wants to create an Organizational Unit certifier below the location Organizational Unit certifier. Which one of the following must she have to accomplish this?

- A. A copy of the Acme Organizational certifier
- B. A copy of the location's Organizational Unit certifier
- C. Reader access to the domain's Public Address Book
- D. Copies of both the Acme Organizational certifier and the location's Organizational Unit certifier

12

Which one of the following is used to allow mobile users to address mail while disconnected?

- A. Domain Catalog
- B. Domain Directory
- C. Directory Catalog
- D. Certification Directory

13

Susan sent a message to Jim but used an incorrect address. She was terminated and her Mail file was deleted. Which one of the following describes what happened to the message sent to Jim?

- A. It was held in the MAIL.BOX as dead mail.
- B. It was returned to Susan as undeliverable.
- C. It was forwarded to the mail administrator.
- D. It was held in the MAIL.BOX as undelivered mail.

14

The Mail file of the sender and the recipient are on different Domino servers, within the same Domino Named Network, and within the same domain. Which one of the following describes when normal priority mail is sent?

- A. Immediately
- B. Only when scheduled
- C. Only opportunistically
- D. Between Midnight and 6:00 AM

15

Which one of the following allows mobile users to designate mail encryption to take place upon connection with a server?

- A. Domain Catalog
- B. Domain Directory
- C. Directory Catalog
- D. Certification Directory

16

While creating a document for mail connection, Cindy set the repeat interval field to 20 minutes. Which one of the following describes what this field controls after a successful connection?

- A. How long to attempt to replicate
- B. How long to attempt to send mail
- C. When low priority mail will be sent
- D. When the next attempt to send normal priority mail will occur

17

The Mail file of the sender and the recipient are on different Domino servers, on different Domino Named Networks, and within the same domain. Which one of the following describes when normal priority mail is sent?

- A. Immediately
- B. When scheduled
- C. Only opportunistically
- D. Between Midnight and 6:00 AM

18

Koki is having routing problems on Server3/Boise/Acme. Which one of the following console commands can he use to temporarily stop only the Router task until the problem is diagnosed and fixed?

- A. EXIT
- B. QUIT
- C. TELL ROUTER QUIT
- D. TELL ROUTER PUSH WAIT
